Make AI useful.

Gavin Sim

An entrepreneur who teaches AI through the work of running a business.

Keynotes and workshops for people who want to move from curiosity to practical use.

A business operator. A practical educator.

COO of Modern Wealth Group. Creator of the OFT AI Framework. Former Singapore Navy officer.

Singapore / Keynotes, panels and workshops

One Man Agency

What should your audience do differently tomorrow?

Start there. Then choose the conversation that helps them take that next step.

Think clearly.

THE HUMAN JUDGMENT ADVANTAGE

AI can produce an answer. People still need to decide whether it is useful. A conversation about evaluating outputs, asking better questions and recognising where context matters.

For leaders and professional audiences

Build something that works.

FROM AI USER TO AI OPERATOR

Move from trying tools to improving one useful workflow. Define the task, provide the inputs and check the result before expanding it.

For SMEs and corporate teams

Start with real value.

THE ONE-PERSON AI BUSINESS

What could you help someone do better? Explore useful services, the role of AI in delivery, and the selling and trust that a small business still needs.

For founders and entrepreneurship groups

> The format follows the goal: a keynote to open a conversation, an interactive session to explore it, or a workshop to practise.

Practical learning, with people.

CTRL+ Analytics / Suntec City / 26 August 2026

A four-hour session on AI data analysis, forecasting and no-code dashboards, with Gavin named as the trainer in the public e2i listing.

Explore the original programme, workshop photo and presentation excerpt.
